

Veritas Classical Schools
Algebra 2
Student Supply List
2023 - 2024

- Notebook: 2-inch, 3-ring binder with at least ten tabbed dividers.
- Notebook paper (recommend college ruled); 200 sheets. Do not use spiral notebook paper!
- Blank notebook paper (200 sheets).
- Graph paper, (recommend 4 or 6 squares per inch), 3-hole punched; 50-100 sheets
- Pencils with eraser (mechanical pencils work well)
- Pack of colored pencils (4 or more colors; used for graphing and drawing diagrams)
- Red pen (for correcting homework)
- Ruler or straight edge; protractor
- Dry-erase markers (darker colors preferred) and an eraser.

Scientific calculator

This Algebra 2 course requires a scientific calculator with trigonometric functions. Use of a calculator is permitted on all assignments and tests; it will save time on most homework exercises.

It is recommended that students have a TI-30 or higher scientific calculator. A graphing calculator is not required for this course, BUT one may be needed for future math classes. Pre-calculus, calculus and many science courses typically require a TI-83 plus or TI-84 plus graphing calculator. If such courses are in the student's future, you might want to make the investment now rather than having to purchase a second, more advanced, calculator in a subsequent year. You may wish to review the resource lists for advanced math and science classes on the Veritas website before making your selection. Also, you may wish to ensure the calculator is acceptable for the SAT or ACT tests.
